EDUCATION

University of Texas at Dallas

Collegium V Honors, Computer Science B.S.

- Cumulative GPA: 3.93
- Dean's List: Fall 2023 - Spring 2025

Richardson, TX

Aug. 2023 – Dec. 2026

EXPERIENCE

UI/UX Design Intern

May 2026 – July 2026

IBM

Research Triangle Park, North Carolina

- Led a design system alignment initiative for the official AEM for IBM.com Components design system in Figma, closing an **8+ month gap** with live AEM implementation and restoring a trusted source of truth for **40+ teams**.
- Delivered **15** new components, **76** component enhancements, and **300+** configurable variants in **2 sprints**.
- **Drove AI-enabled prototyping** for an IBM.com user research study, leveraging **Figma Make** to reduce prototype creation time by **~85% (2 weeks to 2 days)** and accelerate participant testing.

Lead UI/UX Designer (Contract)

Sep. 2022 – Present

Thought Bakery

Remote

- Designed **brands, webpages**, microsites, eBooks, and more for leading software and technology companies.
- Designed and produced highly targeted social media and promotional assets that consistently helped clients achieve **over 100% growth in social engagement** and generate **thousands of resource downloads**.
- Led **all internal design projects**, including full rebrands, pitch decks, and **high-converting** lead magnets.

Multidisciplinary Designer (Contract)

Dec. 2022 – Present

Freelance

Remote

- Led design projects for **10+** clients across various industries.
- Designed **brand identities**, commercial websites, interactive **dashboards**, digital ads, and other creative assets.
- Incorporated client feedback while upholding strong design principles that prioritized user/audience needs.
- Delivered high-quality solutions that drive conversions, backed by lengthy **user/audience research**.

Solutions Engineering Intern

Jun. 2025 – Aug. 2025

Glassbox

Remote

- Developed **Python** scripts that simulate web and mobile traffic, providing user session data in sales demos.
- Designed a UI that enables non-technical sales engineers to simulate demo data and **presented this solution to executives**, demonstrating its potential to **automate demo environment setup** for sales product demos.
- Researched companies in Glassbox's insurance ICP and **designed a demo application landing page** for use in future product demos to insurance clients, **establishing the foundation** for full development of the application.

Product Design Intern

July 2024 – Aug. 2024

Hitachi Digital Services

Dallas, TX

- Designed components with **Material UI** in Figma for a **real-time web application** for a major client.
- Participated in internal and client facing daily scrum, refinement, design, and product demo calls.
- Constructed complex user flows based on extensive **collaboration and research** with end users.

UI/UX Design Intern

Jun. 2022 – Aug. 2022

Thought Bakery

Remote

- Designed a **high-converting and responsive** landing page for a major B2B AI software client.
- Managed design file handoff to developers and provided actionable feedback to ensure alignment with design requirements in production.
- Designed **user-focused, data-driven** infographics, one-pagers, and other resources to drive clients' digital engagement.
